

DIY DOG CRINKLE SOCK!

Materials:

- Socks
- Plastic Bottles

Instructions:

1. Decorate your sock with fabric markers, or try tie-dye! (optional)
2. Wash the plastic bottle and remove the label. Discard cap and remove plastic ring around neck of bottle.
3. Insert bottle into sock.
4. Stretch fabric tightly to tie the knot. Do not use string or other means, just knot the sock. If there's not enough sock left over, use a longer sock or a smaller bottle.
5. If you have extra fabric after the knot, you can cut fringe, braid, or add more knots!

Notes:

- If your sock has a hole, no problem! If the hole is at the toe, just tie a knot there before inserting the bottle. Your toy will have a knot at both ends. If the hole is at the heel, try using a smaller bottle (or even a tennis ball) so that you can tie off the sock at the heel. Braid or knot any extra.
- Do not put anything, including dog food or treats, into the sock or bottle.
